THE FIVE PROMISES

§1 Your price is fixed.

The price we sign is the price you pay. Scope only changes through a written change request you approve, priced before work starts.

§2 You pay as we deliver.

Start with the Blueprint, from \$390 and credited to your build. Then pay each milestone only after you've seen it working and approved it.

§3 You own everything. Day one.

Your code lives in your own GitHub from the first commit. Designs, code and accounts are all yours. No lock-in.

§4 Late? You pay less.

For every full week a milestone is late, 10% comes off that milestone's price, up to 50%.

§5 Bugs fixed free for 90 days.

If something we built doesn't work as agreed within 90 days of launch, we fix it at no charge.

* The clock pauses for client-side delays of more than 2 business days (feedback, content or access), approved scope changes (which come with a new date in writing) and app-store review times.

"Bugs" means defects against the agreed specification. New features are not bugs, and we say which is which in writing.

NEXT STEPS

1. Book your Blueprint call at <https://vowdev.com/contact>, or reply to the email this came with.
2. A VowDev engineer replies within 4 business hours.
3. After the Blueprint you receive the binding Vow with a fixed price and milestone dates.

For VowDev

This document is an estimate, not a contract. Valid for 30 days from October 9, 2026. The binding Vow is signed after the Blueprint.
